When wood would be exposed to high heat, you need a heat-resistant product to offer a strong bond. The heat resistance of Eskay bond PRO HEAT is as high as 170 degree Celsius. After applying the product, you do not need any sustained pressure and your bond will be ready in just a few minutes.

Features and Benefits:

- Quick bonding time of 10-15 minutes
- Heat resistance up to 170 degree Celsius
- Does not require masking tape, clamping, nailing, or pressure for bonding
- Bonds in 10-15 min Faster Completion of Carpentry
- Resists spring-back action of laminates on curved surfaces

Area of Application:

- Best used for all kinds of lamination, especially the ones with a lot of heat exposure
- Ideal for vertical lamination applications

Packaging

- 200 ml, 500 ml , 1ltr, 5ltr
